**DETAILED ACTION**

1. Claims 1,5,9,13,17, and 21 have been amended.
2. Claims 1-24 are pending.

***Response to Arguments***

3. Applicant's arguments filed 27 January 2006 have been fully considered and they are persuasive.

***Allowable Subject Matter***

4. **Claims 1-27 are allowed.**
5. The following is an examiner's statement of reasons for allowance: The present invention is directed toward a method and system for facilitating a global timeout within a distributed computing environment. Each independent claim identifies the uniquely distinct features "**determining if the distributed computing environment has issued an authentication to a user device through which the user accesses the application, wherein the authentication is stored within a time-stamped token on the user device, and determining if the authentication has not expired by comparing an expiry time calculated from the time-stamped token against a current time**". The closest prior art, Ferchichi et al. (Pub No. 2003/0012382) discloses a single sign-on process allowing a mobile user with a mobile phone or with a laptop to remote-access a remote server, either singularly or in combination, fail to anticipate or render the above underlined limitations obvious. The closest prior art, Graham-Cumming, Jr. (US Patent No. 6,182,146) discloses a system, method, and software product dynamically determine network applications associated with any ports being

used by packets on a network, allowing the packets to be properly routed, counted, and reported according to their applications, either singularly or in combination, fail to anticipate or render the above underlined limitations obvious. The closest prior art, Serbinis et al. (US Patent No. 6,314,425) discloses an apparatus and methods for use of access tokens in an Internet document management system, either singularly or in combination, fail to anticipate or render the above underlined limitations obvious.

6. Therefore, **claims 1,9, and 17** and the respective **dependent claims 2-8,10-16 and 18-24** are in condition for allowance.

### ***Conclusion***

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
